

# 1w price of bracket-mounted photovoltaic power generation

## Overview

---

This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type, and installer. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. This work has grown to include cost models for solar-plus-storage systems. is between \$15,000 and \$25,000 before incentives. Surprised?

Grab a coffee, and let's dissect what really goes into those numbers.

### Solar Photovoltaic System Cost Benchmarks

Unlike most PV cost studies that report values solely in dollars per watt, SETO's PV system cost benchmark reports values using intrinsic units for each component. For example, the cost of a ...

Their brackets need extra clearance and reflective surfaces. Adds \$150-\$300 per mounting row, but hey - you're basically getting solar's version of a two-for-one deal.

Do You Really Save Money with Solar Panels? How Much Does Solar Panel Installation Cost? How Much Does One Solar Panel Cost? How Can I Lower The Cost of Solar Panels? Recap The price of solar panels has declined substantially over the last decade as the industry has matured and reached production at the largest global scale. Since 2010, the cost to install solar panels on a home has fallen by roughly 50%. Costs rose slightly from 2020-2023 largely due to supply chain tangles from the pandemic, and then fell again in 2024. See more on solar cost protection
