

395w solar module price

Overview

The average price is about \$230. Usually a 395 Watt solar panel has 144 half-cut solar cells with measurements similar to 72 cell solar panels. American panels and Korean ones - for example, Hanwha Q Cell 395 - are somewhere in the middle of the price range. CELL 395W panel is designed to deliver strong, consistent power no matter the weather. With a sleek silver frame and durable build, it's ideal for rooftops or ground-mounted systems. You'll get more. Shop here to find low priced solar panels that generate 395 watts of DC power. These modules can be grid-tied or used off-grid for residential, commercial or community renewable energy generation.
