

5 million photovoltaic panel power plant

Overview

China's state-controlled firm China Green Electricity Investment of Tianjin has built the world's largest solar plant in Urumqi of its Xinjiang province. It has more than five million PV panels. These solar installations are real, built, and documented proof of humanity's transition to clean energy. The numbers tell much of the story of the Midong solar farm. 5-gigawatt operation in the Xinjiang region, as PV Magazine reported. 26 million panels, according to the news. As big as a city and with millions of solar panels, the photovoltaic park of Midong in China is to date The largest photovoltaic system in the world. (Photo: Getty) China has transformed a vast stretch of shallow coastal.
