

A set of home solar power generation equipment

LIQUID/AIR COOLING

PROTECTION IP54/IP55

PCS EMS

BATTERY /6000 CYCLES

Overview

To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment--at a minimum. Depending on where you live, you may also consider a solar battery. Grid-tied systems are the most common and the cheapest because they use the least amount of equipment: solar panels, wiring, racking, grid-tied inverters, and a net meter. But different product options and brands can. There are a number of steps to follow when planning to power your home with solar energy. It's beneficial for the environment as well as helps you cut power bill expenses. After all, a wise man once said precaution is better than cure. You also contribute to an eco-friendly practice of lessening valuable resources used to generate electricity.
