

Are photovoltaic panels allowed in apartments Zhihu

Overview

Yes, renters can access solar power through community solar programs without installing panels on their rental property. Community solar allows apartment dwellers to subscribe to off-site solar farms and receive monthly electricity bill credits, typically saving 5-15% on energy. They simply have to get permission from their local government to install the panels on their roof or choose to install them in a different location and then hire a company to complete the installation or do it themselves. For renters, things are a bit more complicated. Firstly, it is possible to. Solar energy is not only renewable, it's clean. When the power of the sun is harnessed for energy, it doesn't produce the fossil fuel emissions like electric power does. So I wonder, are there any technical barriers to fixing solar panels to apartment blocks or is it a case of legal restrictions or lack of economic incentive?

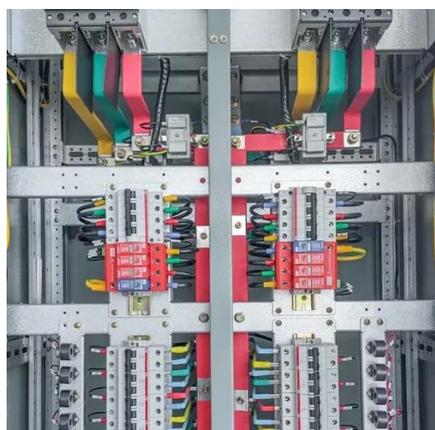

Also, if you did install solar. Can you go solar if you rent your home or live in an apartment?

The simple answer for renters who want solar panels for their apartment or house is that it's possible! While you may be able to pitch your landlord to install a rooftop solar panel system, community solar is more likely to be your. Can renters get solar panels for apartments?
