

Are photovoltaic panels available in other colors

Overview

Solar panels are most commonly black, but they can also be blue, green, or even transparent. If you look at the majority of rooftop solar panels, you might assume that solar panels come in just two colors: black and blue. If those two colors don't fit with your personal aesthetic, or your HOA has certain rules about roof colors, the absence of options for colored solar panels might limit. The color of your solar panels isn't just for looks—it actually affects how much power you get and how well your system works. After all, blue panels have long been the most common variety of. While the vast majority of solar panels come in black or very dark blue (and sometimes dark green,) you might be surprised to learn that colorful solar panels are starting to gain some traction in popularity. Darker colors absorb more light and convert it to electricity, while lighter colors reflect more light and waste some of the energy.

Are photovoltaic panels available in other colors
