

# Box-type solar container system

## Overview

---

The BoxPower SolarContainer is a pre-wired microgrid solution with integrated solar array, battery storage, intelligent inverters, and an optional backup generator. Whether deployed as a standalone microgrid or part of a larger portfolio, our containerized systems ensure rapid. We are a professional manufacturer of integrated solar container systems. SolaraBox solar containers enable customers to achieve greater energy independence and reduce carbon emissions. By delivering clean, accessible electricity, we support sustainable communities and contribute to a healthier. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container. Our containerized energy solution offers notable economic and practical advantages: Renewable energy systems are no longer permanent fixtures; they are now redeployable to cater to your evolving needs. Microgrid system sizes range from 4 kW to 25. 2 kW of PV per 20-foot shipping container, with the flexibility to link multiple.

## Box-type solar container system

### HELIOS SOLAR

Each unit is 100% solar-powered with battery backup, requiring no fuel, generator, or grid connection--ensuring uninterrupted, dependable operation in any environment.

### Renewable Solar Container Generators

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid compatibility.

### 'Grid in a box' combines storage and solar PV modules for a microgrid

Deployable from a standard 20-foot shipping container, each unit can be unpacked and made operational in a day with little to no heavy equipment.

### Solarcontainer Pre-Wired Microgrid Solution

The BoxPower SolarContainer is a pre-wired microgrid solution with integrated solar array, battery storage, intelligent inverters, and an optional backup generator.
