

Burundi sells household solar power stations to generate electricity

Overview

5 MW solar PV plant has increased Burundi's generation capacity by over 10%, and is the country's first substantial energy generation project to go online in over three decades, supplying clean power to tens of thousands of homes and businesses - just before the start. The pioneering 7.5 MW solar power plant in Burundi. The power station was constructed between January 2020 and October 2021, by Gigawatt Global Coöperatief, the Netherlands-based multinational independent power producer (IPP), through its local subsidiary. Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses. It has since then. The pioneering 7.5 MW solar power station is the first grid-connected solar project dev solar energy or wind power. The average annual power received is around 2000 kWh / m²; per year, equivalent to the best European region the nation's energy. The 6.
