

Can the container be used after solar installation

Overview

As a container house supplier, I often get asked if container houses can be equipped with a solar panel system. The short answer is yes, they absolutely can! And in this blog, I'll dive into all the details, from why it's a great idea to how it actually works. The roof space on a shipping container can be used for decking to host people and we have discussed your options there in a previous blog post. With solar arrays installed and integrated into your electrical system you can. These engineering wonders are great for many uses outside of merely transferring goods around the world, with one of the most common secondary uses being watertight storage units. It integrates solar panels, inverters, batteries, mounting structures, and control systems into a single, transportable unit.
