

# Can you sell the electricity generated by solar energy

## Overview

---

The short answer is yes, individuals can sell surplus solar electricity back to electric companies. This is commonly facilitated through net metering programs, where the utility company credits the solar producer for the excess energy supplied to the grid. Most homeowners see \$600-1,500 in annual bill reductions rather than income payments. Location dramatically impacts profitability - With 34 states plus D. Additionally, solar power supports global efforts. Although many people with solar systems on their homes or businesses think that they can sell excess electricity to the power grid, the reality is that you can only sell power to the grid if you have an electricity generator's license and qualified power-generating assets. In return, you earn credits that can lower your utility. The amount of electricity a solar panel system produces will vary depending on where the homeowner or business resides, as this will affect the number of sunlight hours they receive. 5 hours of sun per day, which will cause a 400-watt.
