Supercapacitors, also known as ultracapacitors and electric double layer capacitors (EDLC), are capacitors with capacitance values greater than any other capacitor type available today. Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance. When discharging a super capacitor, drain it all the way! When Discharging a Super Capacitor, Drain It All the Way! When charging a super cap for a backup power system such as a solid-state drive (SSD) or portable medical system, the value, size and cost of the super cap is directly proportional to. As a leading Canberra supercapacitor manufacturer, EK SOLAR specializes in advanced energy storage solutions for industries demanding rapid charge-discharge cycles and extreme durability. A Brief Guide to the Design-In Process Compared to other capacitor technologies, EDLCs (Electric Double Layer Capacitor) are outstanding for their very high charge storage capacity and very low equivalent series resistance (ESR). Their high cycle life, low charging time and their large power output.
