

Collapsed photovoltaic panels

Overview

In 2024, residential solar installations fell by a staggering 31%. Industry leaders such as SunPower, Sunnova, and Mosaic Solar have tumbled into bankruptcy in quick succession, casualties not of technological failure, but of a system that failed to protect its own future. However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar bankruptcies based on our industry data, a number unseen before in our almost 20 years in the solar sector. Now, they are probably selling you a financial product—likely a lease or a loan. Mary Ann Jones, 83, didn't realize this had happened to her until she received a call last year from. US residential solar is on a downturn and it may soon get worse. A sector that until recently boasted double-digit growth and inspired hope for a sustainable energy future has devolved. Utility-scale systems encompass power plants that have at least 1 megawatt (MW) of electricity generation capacity. utility-scale electricity generation amounted to.
