

Current status of New Zealand photovoltaic energy storage market

Overview

The latest Electricity Authority data reveals a solar market gaining both depth and sophistication. With total connections reaching 69,025 as of January 2025, the industry has moved well beyond early adoption into a phase of sustained, strategic growth. New Zealand's solar industry stands at a pivotal moment as regulatory reforms promise to reshape project economics and market opportunities. This makes up an estimated contribution of under 1% of total electricity consumption. Analysis by University of Auckland Associate Professor, Energy Economics, Stephen Poletti, Victoria University Energy Policy Centre Professor Bruce Mountain and Victoria. New Zealand has exempted rooftop solar from building consent requirements, aiming to cut costs and simplify installation processes while maintaining compliance with national safety standards. A 179 MW solar-plus-storage project near Auckland has secured approval from an independent panel, allowing. As of June 30, 2024, there are 62,707 solar power systems installed in New Zealand, with a capacity of 447. " Is the market for solar power growing in New Zealand?

The pace of solar installation and size of the market. Sarah Gillies tells PV Tech Premium that greater investment will be needed to stabilise the New Zealand electricity system, as the next two years will 'continue to be challenging'.
