

# Democratic Republic of Congo replaces battery cabinet for use

## Overview

---

The Democratic Republic of Congo (DRC), responsible for over 70% of the world's cobalt supply, is abandoning its planned export ban in favor of a quota system starting October 16th. New strategies are needed for a transition to clean and renewable energies. With its large reserves of lithium and cobalt, the DRC has a major role to play in the energy transition. The expansion. "We must stop exporting soil," Paul Chanda Kabuswe tells the DRC-Africa Battery Metals Forum, a specialist conference on battery metals that aims to pave the way for a new industry in Congo. "We must move up the value chain until the end so that now there will be benefits to the people that live. The global cobalt market has undergone a seismic shift since early 2025, driven by strategic policy changes in the Democratic Republic of Congo (DRC). As the world's dominant supplier controlling approximately 75% of global production, Congo's decisions have sent ripples across international supply. "The DRC has set a goal to become one of the world's largest battery producers around 2030 or 2040," he says. At the conference, there is also talk of Congo as a future. This article explores how manufacturers like EK SOLAR are addressing the country's unique challenges through innovative battery technologies As the Democratic.
