

Do photovoltaic panels come with insurance when they leave the factory

Overview

Yes, most homeowners insurance policies do cover solar panels, but the extent of coverage depends on several key factors including how they're installed, whether you own or lease them, and your specific policy terms. Coverage varies dramatically by installation type: Roof-mounted panels are typically covered under dwelling coverage with higher limits, while ground-mounted systems fall under “other structures” coverage limited to just 10% of your dwelling coverage—potentially leaving expensive systems. The right solar panel insurance coverage ensures your system is fully protected and that you won't face steep repair or replacement costs out of pocket. Whether you already have solar installed or you're planning your project, reviewing your policy now gives you clarity on what's covered, what. Having comprehensive coverage for solar panels ensures you're protected against such unexpected calamities. Theft Protection: Believe it or not, theft of solar panels is a real threat.
