

Eagle Project Wind Power Generation

1mwh (500kw/1mw)

AIR COOLING
ENERGY STORAGE CONTAINER

Overview

This project represents the largest proposed onshore wind energy facility in North America; when fully operational; the project will be capable of generating up to 3,000 megawatts of clean, renewable power, enough to power nearly one million homes. Fish and Wildlife Service has a goal to maintain stable or increasing breeding populations for both bald eagles and golden eagles. The Service may authorize the "take" of eagles, but only where the take is compatible with the preservation of bald and golden eagles, and the take is. Beginning April 12, 2024, USFWS will offer a general permit application for incidental take of bald and golden eagles for wind energy and power line projects. The general permit option will provide an alternative to project-specific permits, formerly known as Incidental Take Permits. USFWS. WASHINGTON (September 29, 2022) -- Today the U. With an annual power generation capacity of 1. gov/regulations/eagle for more information).

Eagle Project Wind Power Generation

[California Seeking To Save Golden Eagles From Wind Turbines](#)

California is offering up to \$1.5 million in grants for projects aiming to keep golden eagles in three counties from being killed by wind turbines, a renewable energy source blamed for the

[Improvements to FWS Permit Process Could Help Protect Eagles ...](#)

Audubon strongly supports renewable energy--including solar, wind, and geothermal power--that is properly sited and operated in ways that avoid, minimize, and mitigate negative ...

[Eagle Incidental Take Wind Energy Permits , U.S. Fish & Wildlife Service](#)

In addition to continuing to authorize specific permits, we created general permits for certain activities under prescribed conditions, including qualifying wind energy generation projects, ...

[BLM Announces Major Milestone and FWS Issues Record of Decision ...](#)

As part of President Obama's Climate Action Plan to reduce carbon pollution, create jobs, and move our economy toward clean energy, the Bureau of Land Management (BLM) today ...
