

# Electric vehicle costs tajikistan

## Overview

---

The total cost of ownership of electric vehicles is comparable or lower than for fossil fuel vehicles because of low electricity prices. Electric vehicles can also reduce greenhouse gas (GHG) emissions in Tajikistan by nearly 100% since the country has a low carbon grid factor. However, the nation is heavily reliant on imported fuel due to a paucity of fossil fuel supplies. Currently, the price of one liter of liquefied gas in Dushanbe is 6.60 US. Tajikistan is seeing a steady decline in liquefied petroleum gas (LPG) imports, driven by a growing shift toward electric vehicles, according to the country's Antimonopoly Agency.

## Electric vehicle costs tajikistan
