Overview

Since February 2024, the government has waived import duties and luxury sales tax on fully built battery electric vehicles (BEVs). To qualify, automakers must provide a bank guarantee and commit to producing EVs locally at a ratio of 1:1 after imports. This scheme is valid until TEMPO. The policy, introduced under Ministerial Regulation No. 1/2024, is set to. A staggering 90% of planned investment in Indonesia's electric vehicle (EV) ecosystem has already been committed, signaling a dramatic shift in the nation's automotive landscape. Dealers have promptly adjusted their price lists, reflecting a tangible impact from fiscal policy changes rather than mere market psychology. Many. In Indonesia, one such action is the implementation of tax incentives for electric vehicles (EVs), a step aimed not only to reduce carbon footprints but also to shape a more sustainable future.
