

# Electric vehicle range chile

## Overview

---

As of now, 54 brands offer electrified vehicles in Chile, encompassing 150 different models. This marks a notable increase from March 2024, when only 33 brands and 102 models were available. Not only have sales of electric and hybrid cars surged, but the market for electric buses and charging infrastructure has also expanded significantly. The variety of available brands has grown as well. Hard to justify shelling out \$70,000 for a BYD Han when you know that they sell the same model in China for \$30,000. The global shift to electromobility is redefining the automotive industry and creating new opportunities in strategic. The National Automotive Association of Chile (ANAC) published its December 2024 report, stating that electric car sales in the country increased by 183% compared to 2023, reaching more than 4,500 units sold. Breaking down the numbers, the most purchased model was the hybrid, with sales increasing. A vehicle that runs entirely or partially on electricity is referred to as an electric car. E-vehicles, in contrast to traditional cars, employ an electric motor that is fueled by a fuel cell or batteries. The word is typically used to refer to.
