

Electric vehicle range san salvador

Overview

On average, electric vehicles offer a driving range of approximately 350 kilometers, sufficient for daily commutes or trips across the country, thanks to the expanding charging station network. In collaboration with Blink Charging, AES El Salvador has launched a new EV charging station at Plaza Comercial Pasares, located on the Quezaltepeque Highway, kilometer 35 ½, in San Juan Opico, La Libertad. This charging station is part of a new network of ten commercial chargers installed in 2024. The government, recognizing the dual benefits of reducing dependency on fossil fuels and curbing environmental pollution, has introduced policies and incentives to encourage the adoption of electric vehicles, especially as they released the approval on May 20, 2021, for using electric cars. What Makes Electric Cars Essential?

Electric vehicles (EVs) are pivotal for reducing urban pollution. Salvador's government made the approved Law No. 738 for electric transportation. The promotion of incentives to import and use electric and hybrid vehicles in the public and private sectors is this law's primary objective. The report " Vehicle fleet in.
