

Electric vehicles evs fiji

Overview

Fiji is steadily expanding its electric vehicle (EV) infrastructure. As of 2024, Fiji has several EV charging stations across major areas, with networks like The Switch Network actively rolling out more stations. Fiji, 11 AUGUST 2023: In a move towards sustainability and environmental consciousness, Tourism Fiji unveiled its inaugural fleet of electric vehicles (EVs) during a ceremony officiated by the Deputy Prime Minister and Minister for Tourism and Civil Aviation, Hon. In his address at. Fiji imports more than 40% of fossil fuels and spends a significant portion of its earnings on mineral fuel products. Transport is the biggest energy user and emitter of Greenhouse Gas (GHG) with the highest percentage compared to other sectors in Fiji. In Fiji alone, petroleum products make up close to 20 per cent of total imports. As the Fiji Government is committed to achieving net zero greenhouse gas emissions by 2050, there is strong potential for introducing technologies like electric vehicles (EVs) to help reduce the burden of fossil. Fiji Airports has solidified its position as a leader in the region's green mobility initiative by becoming the largest owner of electric vehicles (EVs) in the Pacific. Source He noted that sustainability must be embedded in all development activities, with the tourism sector playing a central role. Fiji's first fully electric taxi, owned by Vesi Taxis, was showcased this Thursday, alongside the official launch of the first local charging network to support electric vehicles (EVs).
