Over the past 5 years, Mexico's energy storage cabinet exports have grown by 72% (2023 Global Energy Storage Report). The country's strategic advantages include: "Mexico's energy storage sector could capture 18% of the Americas market by 2025," notes Juan Martínez, energy analyst at LatAm Power. The report explains that Mexican regulations define five storage modalities -linked to renewable energy plants, load centers, and independent solutions - and formally recognize these systems through interconnection rights, permits, and participation in energy and ancillary services markets. Picture this: factories running 24/7 under Mexico's scorching sun need reliable backup power, while solar farms require Who Needs. As Mexico's energy sector adapts to changes aimed at diversifying its energy mix and enhancing grid reliability, energy storage is a key component of the energy transition.
