

Energy efficient electricity

Overview

By lowering energy use, energy efficiency reduces monthly energy bills and makes energy more affordable for businesses and families. If you are planning to install a small renewable energy system to make your own electricity, such as a solar electric system or small wind. Energy efficiency is providing the same or better service using less energy. Energy services are the benefits we derive from energy use, like illumination, thermal comfort, hot showers, and cold drinks. Efficiency is not the same as conservation.
