

# Energy storage system explosion accident

## Overview

---

On April 19, 2019, one male career Fire Captain, one male career Fire Engineer, and two male career Firefighters received serious injuries as a result of cascading thermal runaway within a 2.16 MWh lithium-ion battery energy storage system (ESS) that led to a deflagration. The database compiles information about stationary battery energy storage system (BESS) failure incidents. There are two tables in this database: Stationary Energy Storage Failure Incidents - this table tracks utility-scale and commercial and industrial (C&I) failures. Other Storage Failure. FSRI releases new report investigating near-miss lithium-ion battery energy storage system explosion. Here is what happened recently and how the incident was dealt with. The recent fire at the Moss Landing Energy Storage Facility in California has underscored critical. Since this series was first issued, there have been at least sixteen further incidents of BESS failures<sup>1</sup> around the world that have resulted in fires and damage to property, although there are no reports of significant injuries. As shown in Figure 1, some 10-15 incidents are reported each year. I have a Ph. Attached is a document covering the tragic injuries from the Peoria AZ fire and discusses the dangerous hydrogen cyanide: E193 Capt suffered a traumatic brain injury.

## Energy storage system explosion accident

114KWh ESS

### [Four Firefighters Injured in Lithium-Ion Battery Energy Storage System](#)

I have a Ph.D. in Aerospace Engineering and lived in Arizona when 2 of 3 in-state lithium-ion battery storage systems burned down. Attached is a document covering the tragic injuries ...

### BESS Incidents

Throughout this series, it has been our intention to educate and inform the reader about the hazards and risks of Lithium-ion battery energy storage schemes based on current knowledge.

### [Lithium-ion energy storage battery explosion incidents](#)

Several lithium-ion battery energy storage system incidents involved electrical faults producing an arc flash explosion. The arc flash in these incidents occurred within some type of ...

### [Dispute Erupts Over What Sparked an Explosive Li-ion Energy Storage](#)

The April 2019 accident near Phoenix put plans on hold to further deploy BESS across Arizona and led to a public airing of conflicting root cause reports issued by the utility and its battery ...

## Arizona ESS Explosion Reports , NFPA

On April 19, 2019 an explosion occurred at the McMicken Battery ESS in Surprise, Arizona injuring four firefighters. The battery ESS was placed into service in 2017, which is prior to the ...

### [Report: Four Firefighters Injured In Lithium-Ion Battery Energy Storage](#)

On April 19, 2019, one male career Fire Captain, one male career Fire Engineer, and two male career Firefighters received serious injuries as a result of cascading thermal runaway within a ...

### [Arizona Energy Storage Fire: What happened and how ...](#)

Read how the recent Arizona energy storage fire happened, and what can be done to prevent such fires from happening again.

### [California battery facility fire raises](#)

## concerns over energy storage

Following a lithium-ion battery fire at the Moss Landing plant in Monterey County in California, communities nationwide are expressing concerns about hosting similar plants. MICHEL ...

Application scenarios of energy storage battery products

## **BESS Failure Incident Database**

About EPRI's Battery Energy Storage System Failure Incident Database The database compiles information about stationary battery energy storage system (BESS) failure incidents.

## Fire at the largest BESS in the world led to evacuation of 1500

On September 4, 2021, a malfunction occurred in the Phase I system of Vistra Corporation's Battery Energy Storage Systems (BESS) at the Moss Landing Power Plant, damaging ...
