

Energy transition samoa

Overview

Samoa has launched an ambitious renewable energy initiative aimed at reducing reliance on fossil fuels and transitioning to 100 per cent renewable electricity generation by 2025. The project is part of Samoa's broader commitment to combat climate change and achieve energy independence. This includes acquiring an electric vehicle (EV) and a solar-powered Electric Vehicle Supply Equipment. Nestled within the Ministry of Natural Resources and Environment, the Renewable Energy Division (RED) is at the forefront of shaping Samoa's environmental landscape towards a low-carbon economy. Established in 2007, RED has emerged as a beacon of change among the 15 dynamic divisions. Litres Meet Electricity Load Growth rate of 4%. Add Generation capacity of. The Japanese government's development agency has signed a five-year agreement with the Electric Power Corporation (EPC) to increase its capability to undergo energy transition in Samoa. Embracing the abundant solar, wind, and hydropower resources.
