

# Ethiopia solar power

## Overview

---

Reports indicate solar accounted for less than 0.5 percent of Ethiopia's total power output last year. Ethiopia has taken a bold leap towards its clean energy future, sealing a landmark partnership with the International Solar Alliance (ISA) and global renewable energy innovators. In a high-profile signing ceremony at the Ministry of Water and Energy headquarters in Addis Ababa, officials unveiled a. As Ethiopia looks to improve access to energy, ease dependence on hydropower, and meet international obligations to reduce greenhouse gas emissions over the coming few years, the government is turning its attention towards the development of solar and wind power projects. While this reliance has positioned the country as one of Africa's leading producers of renewable energy, according to the studies. It has also rendered the energy supply. Ethiopia has been identified as one of Africa's most promising solar power growth markets, with a new industry report pointing to surging electricity demand, large access gaps and policy shifts that are pushing the country onto investors' radar despite persistent financing and regulatory. Having led transformative programs with the World Bank and global initiatives like Mission 300 — aimed at delivering electricity to 300 million Africans by 2030 — Khanna stands at the forefront of the renewable energy revolution. According to the latest Power Systems Transformation report by the Energy Transitions Commission.

## Ethiopia solar power
