

# High-efficiency battery energy storage system

## Overview

---

BESS is advanced technology enabling the storage of electrical energy, typically from renewable sources like solar or wind. It ensures consistent power availability amidst unpredictable energy supply due to factors such as weather changes and power outages. At AES, we are proud to be a pioneer and global leader in battery energy storage systems (BESS), collaborating with partners worldwide to deploy award-winning battery systems that enhance grid reliability, flexibility and resiliency. We developed the world's first utility-scale lithium-ion BESS and. Battery storage is a technology that enables power system operators and utilities to store energy for later use.
