

Hole on the back of photovoltaic panel

Overview

Most solar panels do not have mounting holes in the back; they rely on a smooth, sealed surface for protection. Pre-drilled holes are typically found in the aluminum frames, allowing for secure attachment to mounting systems. These holes are typically located along the aluminum frame that surrounds the photovoltaic cells, providing structural integrity while. One has made a small crack in the actual bit of the panel with the lines and a bigger hole has been made on the panel but not where the lines are. How screwed am I?

Neither make a hole in the outer glass. I've also got a weird kind of cloudy marking on some bits of the panel. It won't seem to rub. Have you tried out dark mode?

! Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Drill additional holes in frame?

I'm planning to build some small wooden frames that are simple and inexpensive to start with.

Hole on the back of photovoltaic panel

[Do Solar Panels Have Mounting Holes in the Back for Easy Installation?](#)
