

Hot solar energy storage products

Overview

There are three main types — Sensible Heat Storage (SHS), Latent Heat Storage (LHS), and Thermochemical Storage (TCS) — each with unique principles, advantages, and applications. Thermal Energy Storage (TES) technologies are emerging as a game-changing solution to decarbonize heat and balance energy supply & demand in intermittent conditions. Our SETS products are designed to meet the diverse needs of residential and commercial users, providing a reliable and environmentally friendly way to harness and store thermal energy. That stored heat can cook meals, keep vaccines cool, or warm homes through the night.
