

How big an outdoor power inverter should I buy

Overview

The rule of thumb is to choose an inverter with a capacity about 25-30% higher than your total wattage requirement. Solar generators range in size from small generators for short camping trips to. An inverter needs to supply two needs: Peak or surge power, and the typical or usual power. Always plan for future load expansions to avoid premature upgrades. Use this comprehensive compatibility checklist to secure system longevity. Simply select your appliances below, and you'll instantly see the inverter size you need. Standard 12v models top out around 3000w (24v/48v ~ 4000w).
