

How much does it cost to use photovoltaic panels for home use

Overview

For most homeowners, a full residential solar setup, panels, inverters, mounting hardware, permitting, and professional installation, runs between \$15,000 and \$30,000 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below).
