

How much is the monthly traffic of photovoltaic inverter wifi

Overview

Based on the details provided, 11GB of upload traffic from your solar inverter/hub over 36 days does seem quite high for normal logging and monitoring. Here are some things you can try to get more visibility: Check the inverter and hub manuals for specs on expected data usage. I discovered that since installation 36 days ago, it has uploaded at least 11gb. Can anyone verify what is or isn't normal?
