

How to photograph wind turbines

Overview

To shoot windmills and watermills you'll need a wide angle lens with a telephoto capability, a tripod if you want to capture long exposures and a backpack to cart everything around in. One of the true Marmite subjects of the photographic world, Wind Turbines are now a major feature of the landscape they are here to stay. I tried some shots at slower exposure to capture the rotors moving however this proved to be quite tricky.
