

Hungary 400 MW solar energy storage

Overview

This in-depth white paper from Solarplaza unpacks Hungary's rapid energy storage evolution, from the country's first national BESS auction and new co-location rules to a restructured grid access regime and booming battery manufacturing sector. The Hungarian government has earmarked HUF 62 billion (\$169 million) for grid-scale energy storage projects in a bid to facilitate further deployment of renewable energy sources. Hungary has 40MWh of grid-scale BESS online today but that will jump 3,400% to around 1,300MWh over the next few years thanks to opex and capex support. The country's National Energy Strategy initially set a target of 6 GW of solar photovoltaic (PV) capacity by 2030 – a goal that seemed ambitious at the time. By 2025, however, that threshold had already been surpassed, with gross installed PV capacity exceeding 9 GW. The revised 2030 target now. Hungary is betting big on batteries — and the market is moving fast. These projects, part of an impressive 2024 growth essential to the nation's energy strategy, have a combined.

Hungary 400 MW solar energy storage

Energy storage capacity getting bigger and bigger

In addition to nuclear energy, Hungary is focusing primarily on solar energy, the weather-dependent production of which poses a particular challenge. The country's total PV capacity has ...

[The Country's Largest Energy Storage Facility Is Being Built in Szolnok](#)

Gábor Czepek, Parliamentary State Secretary of the Ministry of Energy, announced in a video on social media that Hungary's largest energy storage facility is being built in Szolnok (central ...

[Solar Power Expansion Surpasses One Gigawatt in 2025](#)

By early December, approximately 1,030 megawatts of new solar power plant capacity had been built in Hungary in 2025. We first exceeded 1 gigawatt of growth in 2022, and since then ...

[Hungary to open doors for new power plant projects as new capacity](#)

The tender notice will determine the available feed-in capacities for each connection node and technology, the earliest possible connection dates, the amount of connection fees payable, and ...

[Hungary's energy transition: a solar success story ready for the next step](#)

Battery energy storage systems (BESS) have emerged as a critical priority for Hungary's energy transition. Currently, approximately 60-70 MW of storage capacity is operational, with another ...

[Hungary solar energy storage: Impressive 2024 Expansion](#)

Hungary is taking a significant leap forward in its renewable energy sector with the launch of four new solar energy storage projects by Alteo, a Budapest-based renewable energy company.
