## Overview

---

Powerwall 3 is a fully integrated solar and battery system, designed to accelerate the transition to sustainable energy. Customers can receive whole home backup, cost savings, and energy independence by producing and consuming their own energy while participating in grid services. The Powerwall stores electricity for solar self-consumption, time of use load shifting, and backup power. [1][2] The Powerwall was introduced in 2015 as Powerwall 1 with. Before he took on his latest role as chief agitator, the CEO's vision was one of a society that was free from the shackles of fossil fuels, one that could charge a vehicle from home and reduce its reliance on the grid by harnessing the power of the sun. On Wednesday, Tesla announced on X that its Powerwall fleet in Europe has surpassed 1 Gigawatt-hour (GWh), which the company says is enough energy storage to power.
