

# Identification report of solar generator

## Overview

---

These data identify operable solar power plants in the United States, as of June 2024. The survey Form EIA-860 collects generator-level specific information about existing and planned generators and associated environmental equipment at electric power plants with 1 megawatt or greater of combined nameplate capacity. Energy Information Administration, EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and. For those generating systems not interconnected to the PJM Interconnection grid (this includes residential and small business solar systems, as well as generators connected in other control areas) users have a few options for reporting their data. For large generating systems interconnected to the. Note: Click on a heading label to sort the data.

## Identification report of solar generator

---

### EIA 860 Instructions

Generator identification should be the same identification as reported on other EIA forms to be uniquely defined within a plant. For new wind and solar projects a unique generator ID should be used for ...

### PJM EIS

Renewable Generators Registered in GATS Report includes all data up to 2/4/2026 1:00:00 AM  
Results Reset Show Field Chooser

### [Registering a Solar Generator Residential/Small Business](#)

Registering a Solar Generator Residential/Small Business SUMMARY: This solution aid is intended to assist all residential, small business and aggregator GATS account holders who are ...

### U.S. Power Plant Data

These data identify operable electric generating plants in the United States by energy source, as of September 2022.

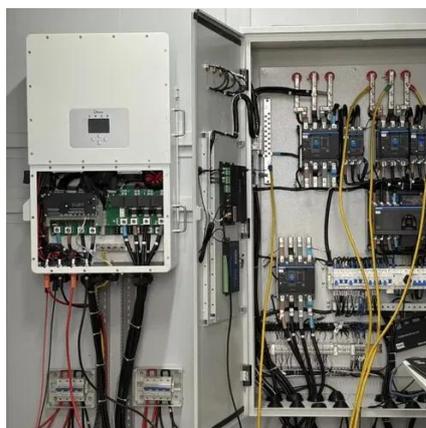

## Reporting Data Manually

For those generating systems not interconnected to the PJM Interconnection grid (this includes residential and small business solar systems, as well as generators connected in other ...

## Electric Power Monthly

Entity ID and Plant ID are official, unique identification numbers assigned by EIA; Generator IDs are assigned by plant owners and/or operators. Descriptions for the Energy Source Codes and the Prime ...

## Generator Identification Information: Plant State, Plant Name, EIA

Report For: Verify the Legal Name of the Entity, Entity Identification Number, address, city, state, zip code and reporting month and year. If incorrect, provide the correct information.

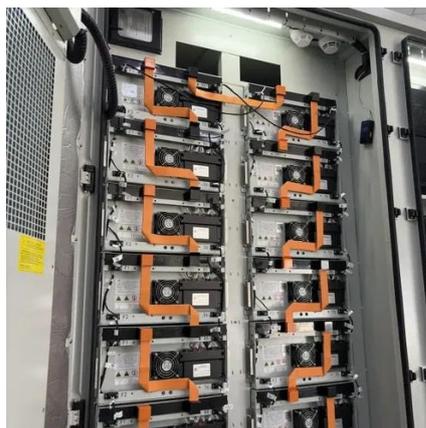

## New Generator Interconnection

## Resource ID Report

The report identifies generator units initiating the resource interconnection process to synchronize to the grid, conduct testing, and ultimately achieve commercial operation.

## [Annual Electric Power Industry Report, Form EIA-860 detailed data ...](#)

The survey Form EIA-860 collects generator-level specific information about existing and planned generators and associated environmental equipment at electric power plants with 1 megawatt or ...

## [file:///C:/Users/kuiper/AppData/Local/Temp/arc3586/tmp973C.tmp.](file:///C:/Users/kuiper/AppData/Local/Temp/arc3586/tmp973C.tmp)

The engine, turbine, water wheel, or similar machine that drives an electric generator; or, for reporting purposes, a device that converts energy to electricity directly (e.g., photovoltaic solar and fuel cells).
