

India solar power generation time display

Overview

The data was collected from 72kWp solar power plant at Karnataka, India over a period from 1-5-2021 to 12-09-2024. India's solar power has grown nearly 20 times since December 2015, at an average growth rate of 40% per year. As of 2025, it is now India's third largest source of electricity behind hydro. This graph charts India's solar power growth relative to the equivalent total electricity demand of other. The Solar Power Plant Energy Generation Dataset is a comprehensive time-series dataset that captures the energy generation patterns of a solar power plant. This dataset is invaluable for researchers, data scientists, and energy analysts aiming to explore solar energy generation trends, forecast. Solar Power* (Cumulative) : 135. 81 GW ^Large Hydro includes 7175. 6 MW Pumped Storage # Excluding Nuclear Capacity of 100 MW, which is under outage for very long time, and have been removed temporarily w. India's. With 100 GW solar power achieved, India is moving towards energy independence and a greener future: Union Minister Pralhad Joshi India has achieved a historic milestone by surpassing 100 GW of installed solar power capacity, reinforcing its position as a global leader in renewable energy. India solar power generation time display

[India's Solar Power Generation Surpasses 123 GW in 2025](#)

From January to August 2025, India added 25,265.41 MW of new solar capacity. In August alone, installed capacity reached 4,113.59 MW, a 3.46% increase compared to July. Wind ...

[India Achieves Historic Milestone of 100 GW Solar Power Capacity](#)

Solar energy remains the dominant contributor to India's renewable energy growth, accounting for 47% of the total installed renewable energy capacity. In 2024, record-breaking 24.5 ...

[Physical Achievements , MINISTRY OF NEW AND RENEWABLE ...](#)

Excluding Nuclear Capacity of 100 MW, which is under outage for very long time, and have been removed temporarily w.e.f. 31.05.2025. For more details, Click below.

India Climate & Energy Dashboard

A one-stop data platform with information across India's climate, energy, economy and environment contours.

Solar power in India

India's solar power has grown nearly 20 times since December 2015, at an average growth rate of 40% per year. As of 2025, it is now India's third largest source of electricity behind hydro. This graph ...

Electricity generation from solar power in India

Electricity generation from solar power in India - Chart and data by the International Energy Agency.

Figures and Statistics , NSEFI

India Marching Ahead in Solar Energy Growth in Solar Installed Capacity (MW) as on 11.02.2025
Figures and Statistics

[Tracking India's solar future: Why every](#)

GWh matters in energy

India has declared an ambitious target of 500 GW of renewable energy (RE) by 2030, comprising around 280-300 GW of solar energy alone. As India graduates from 100 GW to triple its ...

Historical data on photovoltaic (PV) energy generation in India , IEEE

The Solar Power Plant Energy Generation Dataset is a comprehensive time-series dataset that captures the energy generation patterns of a solar power plant.

Solar energy in India

India's solar energy market is experiencing significant and rapid growth, establishing itself as a global leader in solar power deployment. Indeed, in 2023, India was the
