

Iran electric vehicles

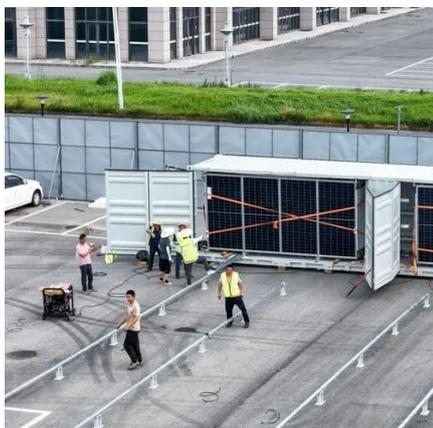

Overview

Iran plans to replace old, gas-guzzling cars with newer electric vehicles, as reported by Tehran Times, a partner of TV BRICS. These efforts show Iran is serious about using energy more wisely and moving away from oil-based fuels. An electric car is charged at a roadside EV charge point, London, October 19, 2021. Despite promises in recent years by the Iranian government to import environmentally friendly cars into the country, there has been minimal to no efforts made, as the domestic car industry is mostly owned by the. Iran's automotive industry has long been a pillar of its economy, contributing around 10% to the nation's GDP and employing 4% of its workforce. 000 electric and hybrid cars by the end of the current Iranian calendar year (ending on March 21, 2024), said the Director General of Iranian Industry, Mine and Trade Ministry's Auto Industry Office, Mehrdad Khosravi. TABNAK, Sep, 04: Iran's electric and hybrid cars. TEHRAN - Iran's Oil Ministry has initiated the development of electric vehicle (EV) infrastructure following a recent resolution by the Economic Council, aiming to diversify the country's fuel mix and improve energy consumption management. This move comes after the Economic Council approved a resolution mandating the integration of EV charging. The Iran vehicle electrification market is undergoing rapid expansion as automotive manufacturers and policymakers prioritize the development and adoption of electric vehicles (EVs) to reduce carbon emissions and dependence on fossil fuels. With supportive government policies, incentives, and.
