

Is smashing photovoltaic panels a crime How to deal with it

Overview

In this comprehensive guide, we will explore 20 practical strategies to safeguard your solar panels from theft and vandalism. From insurance and professional installation to the use of advanced security measures such as alarm systems, motion sensor lights, and security cameras. While once a rather niche concern, solar crime is increasingly making headlines, particularly at commercial-scale installations. According to Spotter Global, theft from solar farms was expected to rise throughout 2024, with growing demand for panels making them both easier to sell and more valuable. According to a study by the National Renewable Energy Laboratory (NREL), the average cost of replacing a stolen or damaged solar panel can range from \$500 to \$1,000 per panel, depending on the size and type of system. Furthermore, the disruption in energy production caused by stolen or damaged. Solar panel conflicts typically involve disputes between homeowners, neighbors, and HOAs over aesthetics, shading, and installation restrictions in residential communities. The answer depends on who you're suing and the nature of your case.
