

Is there any tax rebate for export of photovoltaic panels

48V 100Ah

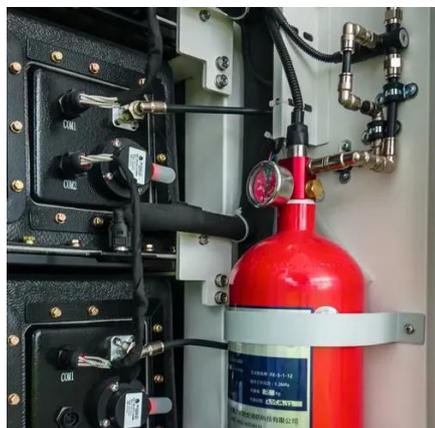

Overview

Starting April 1, 2026, the value-added tax (VAT) export rebates for PV products will be completely eliminated. This decision follows a previous reduction from 13% to 9% in December 2024. The announcement, jointly issued by the Ministry of Finance and the State Taxation Administration, said that export tax rebates for the value added tax of. Export tax rebates are financial incentives provided by governments to encourage exports by refunding a portion of the taxes paid on goods sold abroad. This impacts custom solar panel buyers differently than commodity purchasers—smaller manufacturers face tighter margins, over 50. Chinese authorities have confirmed changes to export tax rebate policies for certain solar-related products, including photovoltaic modules and upstream components. This move will significantly impact processing enterprises. For example, aluminum processors currently earn 27,709 yuan per metric ton, including a 13% tax rebate of 2,859 yuan.
