## Overview

---

The Federal Energy Management Program (FEMP) provides this tool to federal agencies seeking to procure solar photovoltaic (PV) systems with a customizable set of technical specifications. Whether you're planning a rooftop array or a ground-mounted solar farm, choosing the right mounting system directly impacts energy output, safety, and system longevity. "The bracket's tilt angle adjustment capability can boost annual energy yield by up to 18% compared to fixed systems." - Solar. While galvanized steel brackets dominate budget projects (¥36-¥60/m<sup>2</sup>), aluminum alloys are stealing the show in residential installations. A typical adjustable aluminum system like Xiangheng's 41" triangular frame now costs ¥123. 58 after platform discounts - that's 15% lighter than last-gen models. Future Energy Steel offers a wide range of high-quality photovoltaic brackets specifically engineered for modern solar energy systems.
