

Layout of photovoltaic support purlins

Overview

This guide covers measuring and cutting purlins, attaching braces, installing trusses, and avoiding. In the intelligent photovoltaic tracker brackets, cold-formed purlins were used to support the photovoltaic panels, and located spanning the horizontal single-axis and the module frame. Among the critical. The purlin roof has in fact more than one static system. But the support forces of the rafter beams are app critical load of photovoltaic stent u where PV modules are in two rows of portrait position.
