

# Manufacturer of 50kW integrated energy storage cabinet for island use

## Overview

---

This is a 100KWh+50KW small-scale commercial and industrial energy storage system. It can store electricity through photovoltaic, diesel generators, and other means, with off-grid design. It can quickly switch to UPS mode during power outages. Designed to support grid-tied and off-grid scenarios, the Hybrid ESS cabinet offers seamless integration and maximized space utilization, making it an ideal choice for growing energy. The Hybrid All-in-One 50kW/215kWh C&I ESS combines a high-performance hybrid inverter with a robust lithium iron phosphate (LFP) battery system in a modular, compact cabinet. Designed for C&I applications, it combines a PCS, BMS, LiFePO4 batteries, and EMS into a single, sleek cabinet to significantly reduce your energy costs and enhance power reliability. Equipped with fire protection and flexible AC/DC configuration. The modular energy storage integrated cabinet can achieve efficient and safe design of building blocks from 100 KWH small energy storage unit to MWH large-scale energy storage power station, solving the industry common problems such as low system safety, high parallel loss rate, short system life.
