

Mauritania energy independence

Overview

Mauritania is shifting to a fully privatized power generation model, leveraging its natural gas reserves and renewable energy potential to expand electricity access, drive industrialization and attract investment. NOUAKCHOTT, March 27, 2025 - The World Bank Group today approved the Mauritania Development of Energy Resources and Mineral Sector Support Project —known as the DREAM Project —to boost green hydrogen development, expand energy storage, and support critical reforms in the mining sector. As part of this transition, the government will no longer pursue state-led power. Our goal is to provide valuable information and resources to support investment decisions and promote development in the Mauritanian energy market Mauritania boasts a strategic geographic location, spanning over one million square kilometers with a 754-kilometer coastline. Despite its predominantly. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. For the African Energy Chamber (AEC), energy sovereignty.

Mauritania energy independence
