

Microgrid Pilot Measures

Overview

As a result, the National Association of State Energy Officials (NASEO) and the National Association of Regulatory Utility Commissioners (NARUC) created this framework to serve as a resource and guidance for developing a state microgrid policy, program, or regulation. Authorized by Section 40101(d) of the Bipartisan Infrastructure Law (BIL), the Grid Resilience State and Tribal Formula Grants program is designed to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate. This work was authored by the National Renewable Energy Laboratory (NREL) for the U. Department of Energy (DOE), operated under Contract No. Funding provided by the DOE's Communities LEAP (Local Energy Action Program) Pilot. The views expressed in the article do not necessarily. As extreme weather and physical and cyber-attacks on grid infrastructure have led to outages of increased duration, scale, and impact on power customers and communities, policy and regulatory attention has shifted toward innovative investments to improve grid resilience. Numerous state and federal. The following story is brought free of charge to readers by VertexOne, the exclusive EDI provider of EnergyChoiceMatters. Because they are able to operate while the main grid is down, microgrids can strengthen grid resilience and help mitigate grid disturbances as well as function as a grid resource for faster system. This white paper focuses on tools that support design, planning and operation of microgrids (or aggregations of microgrids) for multiple needs and stakeholders (e., utilities, developers, aggregators, and campuses/installations).
