

New battery cabinets launched in Finland

Overview

In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid. The plant, equipped with 26 PowerTitan 1. As energy stakeholders anticipate the completion of the Nivala-based infrastructure, the project led by SEB Nordic Energy's Locus Energy and Ingrid Capacity AB underscores. In Finland, three-meter-tall containers have appeared quietly in forests, fields, and along highways, looking unassuming but packed with technology. Nidec will have the overall responsibility of the construction project and will supply the battery. Renewable energy developer Fotowatio Renewable Ventures (FRV), part of Jameel Energy, has partnered with AMPTank Energy to develop a 100MW/200MWh battery energy storage system (BESS) in northern Finland, the companies said on Monday. The capacity of the energy storage system to be built in Rovaniemi is 30 MW / 60 MWh.
