

Northeast Solar Power Generation Project

Overview

5-megawatt solar facility and substation near Osmond. Northeast Power says the new project will enhance system reliability, improve response times during outages and help maintain affordable electric rates. FARMINGTON, Maine – One of New England's largest solar energy centers is approaching a major power generation milestone. The Farmington Solar Energy Center is on pace to deliver roughly half a million megawatt hours to the ISO New England grid by the end of this year – enough to power every home in. A multi-purpose research facility on the Brookhaven campus Brookhaven National Laboratory developed the Northeast Solar Energy Research Center (NSERC) on its campus to serve as a solar energy research and test facility for the solar industry. The groundbreaking marks a significant milestone for Northeast Power and their customers as they celebrate a vital infrastructure project designed to strengthen electric. Osmond, NE – Northeast Power is moving forward with a significant infrastructure investment aimed at improving the reliability and affordability of electric service for customers in and around Osmond, Nebraska. 6% in 2027, when it reaches an annual total of 4,423 BkWh. The three main dispatchable sources of electricity generation (natural gas, coal, and nuclear) accounted for 75% of. Photo from Stacie Peterson, contestant in the U. Northeast Solar Power Generation Project

[Northeast Power Celebrates New Solar and Substation Project](#)

The project features a 2.5-megawatt solar facility and a new electric substation that together will enhance system reliability, improve response times during outages, and help maintain ...

[One of New England's largest solar energy centers on pace to ...](#)

The solar site began generating electricity in 2021 following a \$110 million investment from NextEra Energy Resources, one of America's largest infrastructure investors. The site is also a boost ...

Major Solar Projects List

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

[Northeast Power Announces New Solar and Substation Project to ...](#)

The project includes the development of a new 2.5-megawatt (MW) solar facility, The Dr. David F. Johnson Jr. Solar Facility, and the construction of a new electric substation.

[Growth of Commercial Solar Projects in the Northeast Region](#)

The Northeast is experiencing a surge in commercial solar projects. Learn about exciting new and planned initiatives transforming the region's energy landscape today.

[2026 2.5 MW Solar System Jackson Nebraska For Northeast Power](#)

Furnish and install a 2.5 MW AC Solar System, including solar modules, combiners, inverters, mounting structures, panels, wiring, and all incidentals. Proposals will be taken for the ...

[BNL , NSERC, the Northeast Solar Energy Research Center , Home](#)

Support the expansion of solar power in the Northeast by providing high quality data, field-testing, analyses, and solar energy expertise to address technical, economic, environmental, and policy ...

Spring 2025 Solar Industry Update

- Together, utility -scale solar and wind generation accounted for more power than coal generation. - Solar overtook hydropower to be the second -largest source of renewable energy ...

[Northeast Power starts new project in Pierce County](#)

OSMOND, Neb. -- Northeast Power is breaking ground in Pierce County with a new power grid project. The company is installing a 2.5-megawatt solar facility and substation near Osmond. ...

[Solar power generation drives electricity generation growth over the](#)

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...
