

Oslo solar Glass Project

Oslo solar Glass Project

[Oslo pilot shows how public buildings can pair solar and green roofs](#)

A new approach to vertical solar installation is resolving the conflict between green roof mandates and solar requirements in public sector renovations.

Nordic Light Fjordporten Oslo S

The project, called Nordic Light, comprises a master plan for the area and a modular glass-enclosed timber tower that will further develop the Oslo Central Station area into Norway's ...

Oslo , Solarpunk Cities

A pioneering 18-storey tower with a wooden facade, Oslo's Vertikal Nydalen is a mixed-use sustainability concept par excellence--combining triple-zero energy performance with public, residential, and office ...

[Løren School Leads the Way in Green Roof Solar Innovation](#)

Løren Elementary School in Oslo has taken a significant step toward sustainability by integrating solar energy technology with its existing green roof. The challenge was to install solar ...

The Ruseløkka School , Solarlab

The school was a Finalist for the Oslo City Architecture Prize 2022, recognised for its architectural clarity and environmental performance. The project incorporates both roof and façade-integrated solar ...

A climate-neutral school

The school is a model project from FutureBuilt, a Norwegian platform for urban climate innovation aimed equally at developers, architects, municipalities, contractors and building users.

A climate-neutral school

Løren Elementary School in Oslo has taken a significant step toward sustainability by integrating solar energy technology with its existing green roof. ...

Kringsja Skole

Designed with double glazing, the photovoltaic glass offers a U-value of 0.7 W/m²K, making it perfectly suited for Norway's cold climate. With an installed capacity of 2.8 kWp, this system is expected to ...

[Vertical rooftop PV specialist switches on two more systems on green](#)

Norway-based PV system provider Over Easy has deployed two vertical solar arrays on green rooftops in Norway. The company deployed a 102 kW installation covering 1200 m² on a flat ...

[Løren School: Oslo's First Green Roof with Vertical Solar Panels](#)

This innovation program is designed to give startups in Oslo the opportunity to pilot their technologies with municipal utilities. For the municipality, it represented a chance to demonstrate the ...

[Oslo to expand world's largest vertical rooftop solar field](#)

Norway wants to expand what is already the world's largest vertical rooftop solar power system. After a successful launch in May, the installation on the country's national football stadium "is ...
