

# Photovoltaic energy storage power supply device

## Overview

---

Simply put, a PV battery system combines standard solar panels with a battery storage unit. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. You can then use your stored energy to power the devices and appliances in your home day and night, during outages or when you want to go off-grid. With customizable power modes, you can optimize your stored. Generac Solar & Battery Solutions provide a more powerful, resilient and smart way to manage your energy needs. enabling the storage of excess energy produced.
