

Photovoltaic hydrogen energy storage plan public announcement

Overview

California- Today, the Alliance for Renewable Clean Hydrogen Energy Systems (ARCHES) and the United States Department of Energy (DOE) officially announced the signing of a landmark \$12.6 billion agreement, including up to \$1.4 billion in public and. Project Polo will deploy commercial-scale PV and storage to create integrated virtual power plants across 27 states. As part of the Biden-Harris Administration's Investing in America agenda, the U. The green hydrogen plant will get its power entirely from onsite solar and long-duration battery storage. 7. San Ramon, Calif., February 29, 2024 — Chevron New Energies, a division of Chevron U., announced it is developing a 5-megawatt hydrogen production project in California's Central Valley. The project aims to create lower carbon energy by utilizing solar power, land, and non-potable produced. What you need to know: With agreement signed and first round of funding secured, California is the first state to officially launch a Hydrogen Hub, an initiative to accelerate the development and deployment of clean, renewable hydrogen projects - cutting pollution and expanding clean energy.
